

We are a unique business, offering a tailored approach to helping our customers create, develop, and enhance their food retail spaces.

Working with world renown manufacturer Criocabin from Italy, we design and provide elegant and sophisticated displays combined with the latest engineering technology, to create the perfect aesthetic and atmospheric environment for the foods on display. Our Criocabin range of counters include a wide selection of standard modular options, but for the more adventurous our bespoke production can literally create your dreams.

To complement our refrigerated equipment, we also offer a bespoke service for the design and production of furniture, shelving and ambient displays to provide a full package of fixtures for our customer's stores.

Of course, this level of input to your project, the service and engineering we provide, and the quality of the products and materials used do not come cheaply, but the results set your business apart from your competitors and ensure value and long term benefits. We are proud to have a long list of happy customers all across the UK, and would be pleased to introduce you to them, so they can share their experiences of working with us and the benefits their businesses have gained with our help.

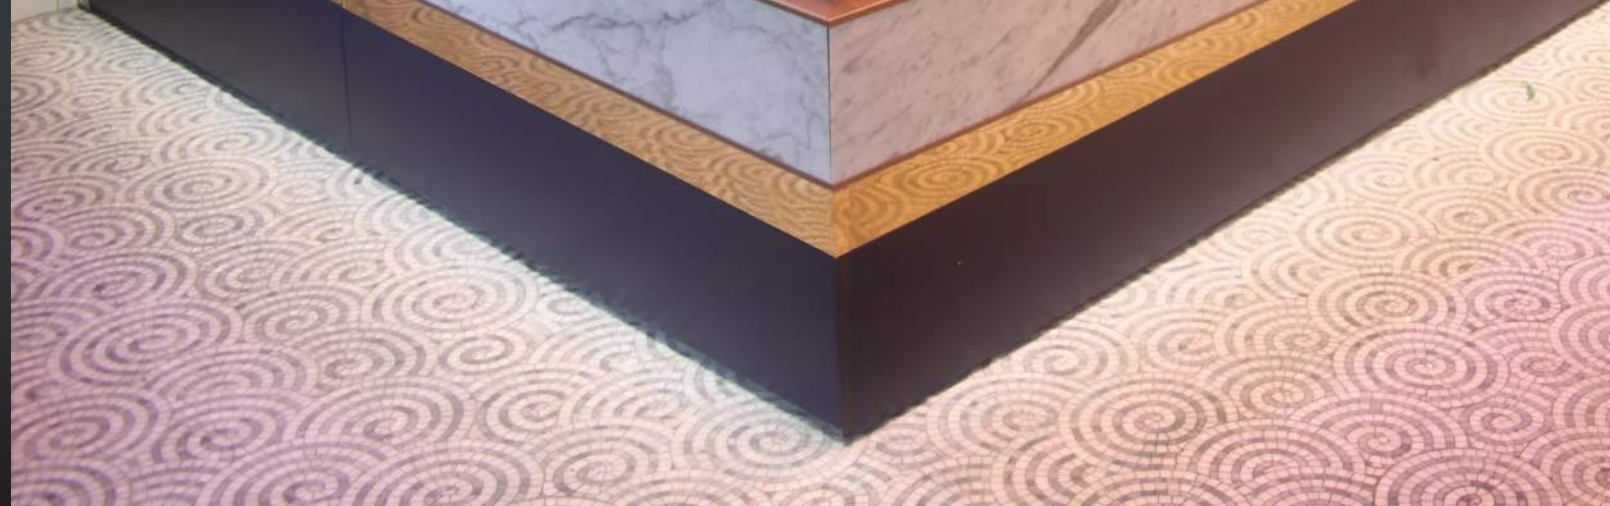

If this small brochure interests you then please take a look at our website for product information and many more case studies, but most importantly call us, to give us the opportunity to see how we could help you develop your food retail business.
